CMS ISSUES SPECIFICATION SHEETS FOR PROGRAM YEAR 2016 MU OBJECTIVES AND MEASURES

Program Year 2016 is underway, and CMS has issued the Specification Sheets for the Objectives and Measures providers will be meeting. Find them, along with guidance, tipsheets and other resources at the [CMS Program Year 2016 webpage](#).

THE BLUEPRINT CLINICAL DATA REPOSITORY IS A SPECIALIZED REGISTRY

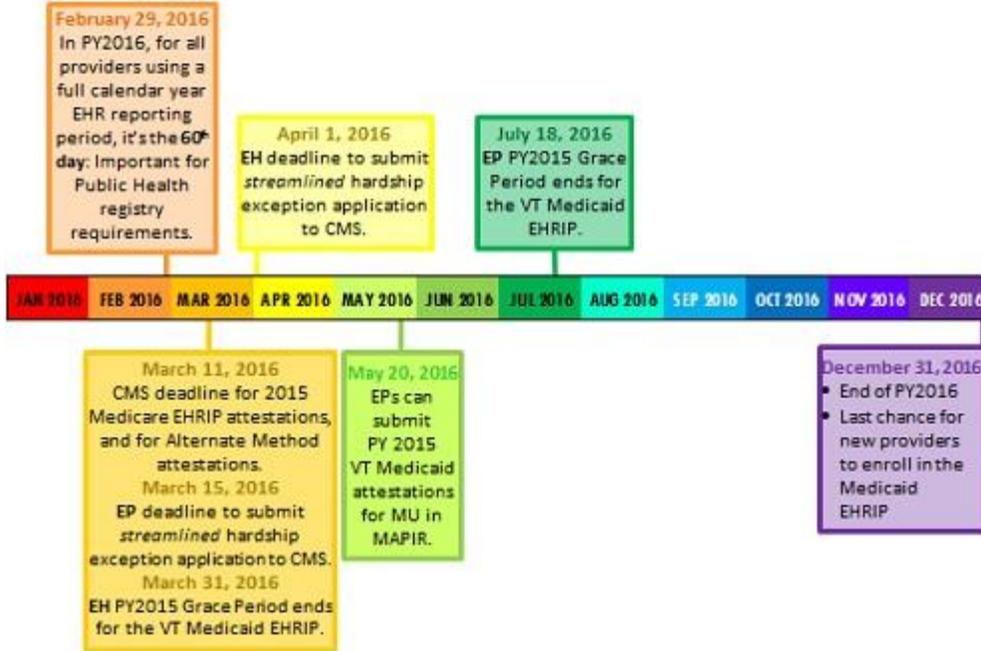

Providers with practices participating in the Vermont Blueprint for Health may use the Blueprint clinical data repository to meet the Specialized Registry measure. Most Blueprint practices send their data through VITL's Health Information Exchange where it then flows to the Blueprint data registry. Although the flow of data from the HIE to the Blueprint registry has been interrupted since September 2015, it is expected to be up and receiving data again by Spring 2016.

- Providers who are currently submitting data to the HIE and waiting for the Blueprint Data Repository can count this as meeting the Active Engagement requirement.
- Providers who are not submitting data to the HIE, but want to send their data to the Blueprint Clinical Registry can claim an exclusion because the registry is not capable of accepting the data.

Do not hesitate to [contact the EHRIP Team](#) with any questions about this measure.
