The Vermont Medicaid PIP/EHRIP Team receives many questions around selecting the right 90-day Patient Volume time period for the two options available, as shown in the MAPIR attestation screens:

**Calendar Year Preceding Payment Year**

or

**12 Months Preceding Attestation Date**

1. **Calendar Year Preceding Payment Year**

   Using **Program Year 2018** as an example, when selecting the option “Calendar Year Preceding Payment Year,” you will be able to put in a Start Date from any date in **Calendar Year 2017**, as long as the end date of the 90-day period is also contained within Calendar Year 2017. In the example below, the start date of 10/03/2017 was entered:

   Upon clicking “Save and Continue” MAPIR calculates the correct 90-day period and automatically fills in the end date: 12/31/2017.
However, if you enter a start date that violates the rules of your 90-day Patient Volume period option, an error message will appear:

* The date that you have specified is invalid.

You will not be able to proceed with your application. In the example below, the start date entered is 10/04/2017. It is invalid because the end date of the 90-day period would be 01/01/2018, which is NOT in Calendar Year 2017:

![Error Message](image)

### 2. 12 Months Preceding Attestation Date

In the example for the option to submit a 90-day period from the “12 Months Preceding Attestation Date” option, the illustration demonstrates submitting a Program Year 2018 attestation on March 6, 2019.

The earliest date you can choose for the 90-day Patient Volume period if you are working on/submitting the attestation on 3/6/2019 is 03/06/2018. Here are the screenshots from MAPIR showing the start date and automatically-calculated end date of the Patient Volume period:

![Screenshot](image)
When using 03/06/2019 as the submit date (red circle),

the 2018 dates highlighted in purple illustrate the EARLIEST start date and time period you can use for the 90-day Patient Volume time period:

If you are delayed, and are unable to submit your attestation until 03/07/2019, the Patient Volume time period will no longer be valid, and you will receive the error message: *The date that you have specified is invalid.*
Stepping forward one day on the application start or submit date (red circle), means the EARLIEST start date for your Patient Volume period also moves forward by one day, to keep within the “12 months Preceding Attestation Date” definition. The submit date is **03/07/2019**, so the earliest time period for the 90-day Patient Volume period is now 03/07/2018 – 06/04/2018:

![Calendar](image)

When using the “12 months Preceding Attestation Date” option for the 90-day Patient Volume time period, the start date may expire before you submit your attestation. Therefore MAIPR has a warning: “**Please note:** the dates you have selected above may be invalid if you attempt to submit your application at a later date.”

If you have any questions, or if you receive an error message regarding your Patient Volume time period and are unable to resolve the correct start and end dates, do not hesitate to contact the PIP/EHRIP Team for assistance in aligning your information: ahs.dvhaEHRIP@vermont.gov
